I. Frescoes

The Fresco was the first Adult design to feature our now iconic logo metal plate on the heel. The irregular contours of the leather overlay represent breaches. In the first edition, they opened on a satin underlayer.

Because yes there are cracks. That's how the light shines through

So we naturally called her fresco, in reference to these old murals that peel and reveal what's underneath the surface.

Layerings materials to create a pattern has now become an Adult trademark, and we consider it to be an homage to how complex and colorful we all are.

Oh, and because we praise bold uniqueness, our pieces are all available in sizes EU36-46

II. Bengals

The Bengal is the lushious, sexy yet elegant sister. We wanted to keep celebrating individuality and guts. Animal stripes, we know it, are specific to their owners. Unique. Like giant, blown-up fingerprints.

It's this symbol, and the boldness associated to it, that we decided to emulate here. The ankle-boot features an overlay of textures as well as colors, with a combination of calfskin and suede.

The fit of the Bengal is comfortable, wider than the Frescoe, with a front zip. We also developed it in two different heel-height and three styles, making it adaptable to different li-festyles.

III. Ornaments

Since our very first release, we have been developing some pieces like collectibles. Pieces decorated with elaborate artworks, that express our commitment to details and uniqueness. And our fundamental nature as storytellers.

The very last edition of our Ornaments series won't be unveiled until September 16th, Adult's birthday. It's been two years, and the sun keeps rising, so we wanted to celebrate with a release of three exclusive, never seen before pieces. But to keep you alert, here's a peak:
